ATHOS Collection

ZINCOMETAL S.A. is constantly developing and improving its products. For this reason, all product descriptions in this catalogue are intended as a general guide, and we may change specifications from time to time in the interest of product development, without prior notification or public announcement. Regarding the validity of the International Standards it is considered always the oldest edition.

Stay tuned with the company by signing up in ZINCOMETAL's Newsletter (www.zincometal.gr) and Social Media.

2.0. Decorative Aluminium Lighting Poles

Introduction

Our design department has designed and developed aluminium lighting poles with smooth, striped or fluted section in order to follow modern developments and new trends of urban lighting by introducing lighting modern systems. Their design is eco - friendly and it naturally lights urban areas.

It is made of extruded aluminium, anodized or electrostatic powder coating surface finish in straight or stepped form.

In order to adjust the luminaires on the lighting poles we have designed special die-cast aluminium connectors and a series of decorative brackets from aluminium or galvanized and electrostatic powder coating surface finish (Duplex System) steel designed in modern designs.

This category includes the following types of poles:

- ATHOS Collection with straight circular striped or smooth section and specially designed decorative brackets.
- NOVA Collection with circular fluted cross-section in straight or stepped form.
- ARMONIA AL Collection with conical circular cross-section.
- PLAZA AL Collection with a straight square or rectangular cross-section.

Decorative aluminium lighting pole of ATHOS Collection of striped circular cross-section with aluminium base plate and post-top luminaire ZINLUX ASTRA 500S.

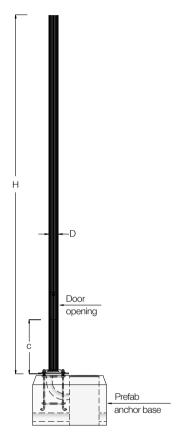

2.1.1. ZINLUX ATHOS R

With base plate

Pole drawing model

Introduction

Decorative aluminium lighting pole ZINLUX ATHOS R of straight striped circular cross-section with aluminium base plate.

Material

The body of the pole is manufactured with an extruded aluminium alloy of quality $AIMgSi_{0.5} F_{22}$ and its cross-section is shaped as a stripe.

Surface protection

Anodizing of thickness 15 to 20µm and electrostatically powder coated surface finish.

Technical features

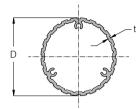

It is manufactured of a piece of extruded aluminium tube of straight striped circular cross-section. The body is internally configured in order to create three (3) longitudinal aids to give the necessary strength and to adjust the connection accessories and decoration. On pole's basis a base plate of die-cast aluminium quality of AS12F, in circular cross section with a curved shape and internal gusset for additional strength, is welded. Door opening is made from the body of the pole through special saw machine. It fits tightly and it's equipped with security lock. Manufacturing according to EN-40.

Certificates

CE Certificate of Notified European Body (EN-40, European Commission).

Cross-section

Straight striped of circular cross-section (D: cross-section, t: thickness).

Door opening

Door opening is made from the body of the pole through special saw machine. It fits tightly on the pole and is equipped with a security lock. It ensures the desirable aesthetic result. Ingress protection IP54 and protection against external mechanical impact IK10. Finally, it is accompanied with a security lock ZINCOMETAL of a triangular socket. It is user - friendly.

Connection and safety of electrical circuit

Junction boxes

Range A-M2, A-M3, A-M3A

Junction boxes are made from polyamide resins, self-extinguishing and infrangible IP43 (A-M2) and IP54 (A-M3, A-M3A) and IK08 (A-M2, A-M3A, A-M3). It is suitable for poles of section Φ 102 (A-M3) and Φ 121 (A-M3A, A-M2).

Decorative tops

Top's accessories K Series

Die-cast aluminium top accessory for top mounting in pole with spigot Φ102 (K-102) and Φ121 (K-120).

T Series

Die-cast aluminium top accessory $\Phi60$ for fitting in the luminaire for pole spigot $\Phi102$ (T 60/102) and $\Phi121$ (T 60/120) or for fitting through decorative die-cast aluminium scissile connector decorative bracket for pole spigot $\Phi102$ (T 60/102M) and $\Phi121$ (T 60/120M).

Decorative details of the base

Base plate

BP/AL/330

Die- cast aluminum base plate of diameter $\Phi 330x10mm$ with holes distance 205x205mm and additional internal triangular gussets.

Anchor bolts protective

cover

N-PL/16

Plastic cover for nuts and threads for anchor base of polyethylene highly resistant to atmosphere and chemical agents. It offers extra protection against dust and asphalt. Wide and flexible rim to ensure adhesion. It is suitable for anchor bolts M16.

Pole anchor bases

Prefab anchor base

ZINCOMETAL prefab concrete base is an innovative product which aims to cover every project needs.

Benefits:

- Durability and Strength.
- Easy and flexible electrical works.
- It can be transported to the project.
- Installation and completion in real time to minimize cost and time.

PR-M/800/205/16

ZINCOMETAL prefab concrete base 800x600x550mm is equipped with 4 hot dip galvanized anchor bolts M16x500mm in arrangement 205x205mm, the manwhole, the tube in which the cable pass through and the necessary equipment/accessories.

PR-M/1000/205/16

ZINCOMETAL prefab concrete base 1000x500x700mm is equipped with 4 hot dip galvanized anchor bolts M16x500mm in arrangement 205x205mm, the manwhole, the tube in which the cable pass through and the necessary equipment/accessories. If it is necessary, it can be used as a primary base in order to construct a bigger one.

Anchor base

Another alternative suggestion for installation in real time is the pole anchor base, which is delivered hot dip galvanized.

BAG M16/50/Z/205

Pole anchor base with 4 anchor bolts M16 of 500mm length each one, in arrangement 205x205mm.

ZINLUX ATHOS R

Root mounted

Pole drawing model

Introduction

Decorative aluminium lighting pole ZINLUX ATHOS R of straight striped circular cross-section without base plate (root mounted).

Material

The body of the pole is manufactured with an extruded aluminium alloy of quality $AIMgSi_{0.5}F_{22}$ and its cross-section is shaped as a stripe.

Surface protection

Anodizing of thickness 15 to 20µm and electrostatically powder coated surface finish.

Technical features

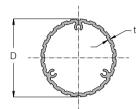

It is manufactured of a piece of extruded aluminium tube of straight striped circular cross-section. The body is internally configured in order to create three (3) longitudinal aids to give the necessary strength and to adjust the connection accessories and decoration. Door opening is made from the body of the pole through special saw machine. It fits tightly and it's equipped with security lock. Manufacturing according to EN-40.

Certificates

CE Certificate of Notified European Body (EN-40, European Commission).

Cross-section

Straight striped of circular cross-section (D: cross-section, t: thickness).

Door opening

Door opening is made from the body of the pole through special saw machine. It fits tightly on the pole and is equipped with a security lock. It ensures the desirable aesthetic result. Ingress protection IP54 and protection against external mechanical impact IK10. Finally, it is accompanied with a security lock ZINCOMETAL of a triangular socket. It is user - friendly.

Connection and safety of electrical circuit

Junction boxes

Range A-M2, A-M3, A-M3A

Junction boxes are made from polyamide resins, self-extinguishing and infrangible IP43 (A-M2) and IP54 (A-M3, A-M3A) and IK08 (A-M2, A-M3A, A-M3). It is suitable for poles of section Φ 102 (A-M3) and Φ 121 (A-M3A, A-M2).

Decorative tops

Top's accessories K Series

Die-cast aluminium top accessory for top mounting in pole with spigot Φ102 (K-102) and Φ121 (K-120).

T Series

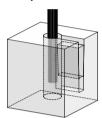

Die-cast aluminium top accessory $\Phi60$ for fitting in the luminaire for pole spigot $\Phi102$ (T 60/102) and $\Phi121$ (T 60/120) or for fitting through decorative die-cast aluminium scissile connector decorative bracket for pole spigot $\Phi102$ (T 60/102M) and $\Phi121$ (T 60/120M).

Pole prefab bases

Prefab base for root mounted poles

ZINCOMETAL prefab concrete base is an innovative product which aims to cover every project needs.

Benefits:

- · Durability and Strength.
- Easy and flexible electrical works.
- It can be transported to the project.
- Installation and completion in real time to minimize cost and time.

PR-P/700

ZINCOMETAL prefab concrete base 700x700x900mm for quick installation of the root mounted poles. It is equipped with a hole in which the pole is embedded and a hole in which the cables pass through.

2.1.2. ZINLUX ATHOS S

With base plate

Pole drawing model

Introduction

Decorative aluminium lighting pole ZINLUX ATHOS S of straight smooth circular cross-section with aluminium base plate.

Material

The body of the pole is manufactured with an extruded aluminium alloy of quality $AIMgSi_{0.5}F_{22}$ and its cross-section is smoothly shaped.

Surface protection

Anodizing of thickness 15 to 20µm and electrostatically powder coated surface finish.

Technical features

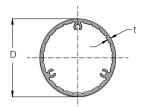

It is manufactured of a piece of extruded aluminium tube of straight smooth circular cross-section. The body is internally configured in order to create three (3) longitudinal aids to give the necessary strength and to adjust the connection accessories and decoration. On pole's basis a base plate of die-cast aluminium quality of AS12F, in circular cross section with a curved shape and internal gusset for additional strength, is welded. Door opening is made from the body of the pole through special saw machine. It fits tightly and it's equipped with security lock. Manufacturing according to EN-40.
